Transl. of Trsent[ra'znyj] Inst[itut] Progn[ozov]
Moscow: Trudy (LSSR) 1958, no. 71, p. 48-77.

For the period from 1891 to 1956, 92 months were observed which were characterized by a significant anomaly of the mean monthly air temperature. Five groups of the distribution of the mean monthly air temperature anomaly were established. The first group is characterized by a significant positive anomaly of the mean monthly air temperature over almost all the territory considered. The second group comprises months with a significant negative air tem- (Earth Sciences - Meteorology, TT, v. 5, no. 6) (over)
